ABSTRACT

We are offering a product that will continuously be expanded and upgraded based on the input we receive from our users and our own extensive market analysis..... is the blockchain-based centralized platform that aims to build a free, global digital content entertainment system with distributed Blockchain Technology, and allows easy and Cost-effective or almost zero cost sharing of digital content. This creates a secure lending environment where the lender receives a high yield interest rate annually paid of staking.

DEVELOPMENT TEAM

The group is completely dedicated to the Improvement and age of the companying for Software development teams to work Together to build a technical project. In SPEEDON, each person on the development team plays a part in making this happen and should be held Accountable for their work. The group is completely dedicated to the Improvement and age of the Company. The system runs smoothly across the Globe while providing full-proof data security. Thanks to Blockchain infrastructure, every single node in the system has its own unique identity. Blockchain technology increases security and speeds up the exchange of information in a way that is cost-effective and more transparent
